**DETAILED ACTION**

1. Applicants' response to the office action and amendment filed on November 18, 2004 have been entered and considered.
2. Applicants' submission of terminal disclaimers (submitted on January 7, 2005, January 12, 2005, and January 25, 2005) in response to the issues of double patenting raised by the Examiner, in a telephonic interview (1/4/05) have been considered.
3. The following is an examiner's statement of reasons for allowance:

Claims 81, 86-99, 101-106, 108-109 are allowed.

The present invention is drawn to a ligase mediated method of invitro recombination using a DNA ligase and repeating ligating and denaturing steps multiple times in the absence of a polymerase to form random recombinant polynucleotides. The closest prior art teach invitro recombination in the presence of a polymerase and did not teach or suggest random recombination in the absence of a polymerase. Thus the instant invention was not taught or obvious over the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
